Celebrated as one of America's great prose stylists, John Updike astonishes us here with the range of subjects he considers. Shrewdly admiring essays on American past masters such as Edith Wharton, Herman Melville, Edmund Wilson, and Dawn Powell take their place beside penetrating assessments of contemporary peers and rivals--John Cheever, Norman Mailer, Tom Wolfe, and Martin Amis. Here too are brilliantly original essays on religion and literature, lust and dancing, as well as a revealing selection of pieces about himself and his work. Whether he's writing about photography or film, golf or adultery, Bill Clinton's hair or the sinking of the Titanic, Updike never fails to dazzle or surprise. Generous, learned, and wickedly funny, More Matter is a triumph of style and substance.
