THE FIRST PICTURE BOOK was originally published in 1930 with twenty-four exquisite photographs of "everyday things" by Edward Steichen and a preface by his daughter, Mary Steichen Calderone, then a leader in the progressive school movement. One of the first children's books to be illustrated with photographs, it represents a landmark in the field. The photographs are among Edward Steichen's most appealing and least-known works. In the afterword, written for this new edition, John Updike reflects upon childhood and memory.
