### Book Description

The Magic School Bus was a series of children's books intended to teach scientific concepts to children. The books feature the exploits of Ms. Frizzle and her class of students at Walkerville Elementary School who board a magical school bus which takes them on educational adventures to space, under the Earth, into the human body, or to other such locations. The books were written in the first person from the point of view of an unnamed student in the Friz's class.

### Synopsis:

Hi, I'm Dorothy Ann. Ms. Frizzle's class ended up on the other side of the world when we went searching for the cackling kookaburra. It was a wild walk-about to Australia. We had a hopping good time racing a herd of kangaroos and survived a run-in with the terrible Tasmanian devil. Things got pretty hairy in the outback, but there's never been a field trip quite like the Expedition Down Under.
