isbn:9780028656892

Covering all aspects of death and dying--biological, medical, social, sociological, religious and philosophical--the two-volume set also provides a deep historical and

cross-cultural perspective through the ages. Article coverage includes: AIDS; children; cremation; communication with the dead; grief and mourning across cultures; life expectancy; widows; and much more. The "Encyclopedia also includes 150 illustrations; an appendix providing general overviews and contact information for nearly 80 organizations; and a comprehensive index.
