This book is a visual journey, like a musical score, a personal diary, a compilation of images captured from the way John Bernhard sees the world. The readers’ eyes wander from one page to the next through a poetic visual narration from different subject matter and aesthetic sensibilities. Drift sets the mood of the book, a steady continuous movement or development from one thing, one place toward another.

作者介绍:

A native of Switzerland, John Bernhard traveled North America extensively before settling in Houston, Texas. For more than two decades he has chosen the medium of photography to explore the everyday world from new perspectives, breaking away into different pathways of artistic expression. He continues to devote all his energy taking photographs and bringing them together to enhance their meaning with visual interplay.
