A British agent uncovers a secret nest of Nazi submarines, German agents mysteriously multiply in Ireland and a massive Nazi parachute drop is imminent somewhere in Britain. This is the background for Craig Thomas's exciting story of a secret action so lethal and unorthodox that all traces of it were instantly obliterated until a top American author after the war sought information for a new novel and during the course of his research uncovered the mystery of his father.

Emerald Decision was the second and last novel written by Craig Thomas under the pseudonym of David Grant. Unlike the first and forgotten Moscow 5000, Emerald Decision would later be re-issued under the rightful name of Craig Thomas.

作者介绍:
