Ever wondered if cowboys do it with their boots on? What music a record store clerk

plays while going at it? What's really happening up there in the projection booth during the movie? Sex Advice From... bypasses the experts and hits the streets (and the farm, and the runway) for advice on the way we really do it. Featuring perfectly respectable photos of real people with interesting jobs -- and even more interesting sex lives -- this book collects interviews from more than 200 willing participants. Before sending their brave correspondents into the trenches, the editors at Nerve.com spent weeks locked inside the Nerve war room drawing up a comprehensive list of questions about all things sex&#151;dirty talk, home movies, hygiene, foreplay, blowjobs, anal techniques, and threesomes, to name just a few. The correspondents then traveled far and wide in search of novel advice. They spoke to bloggers, tour guides, lifeguards, pool cleaners, sideshow performers, and ex-pats living all over the globe. The result? This chunky paperback chock-full of everything you ever wanted to know about sex but were too afraid to ask the salesman at your local car dealership.
