In "On God" Kirshnamurti has one primary goal in mind--to tell people to stop seeking knowledge of the unknowable. Is is his contention that only by doing so can we free our minds from the entrapment of faith. I found the book to open both my heart and my mind by showing how futile certain secular religious beliefs are and how we should focus more on accepting that there are certain realities we do not have answers for. A book everyone should read for it's simple yet totally unique perspective.
