This book constitutes the refereed proceedings of the 5th International and Interdisciplinary Conference on Modeling and Using Context, CONTEXT 2005, held in Paris, France in July 2005. The 42 revised full papers presented were carefully reviewed and selected from a total of 120 submissions. The papers presented deal with the interdisciplinary topic of modeling and using context from various points of view, ranging through cognitive science, formal logic, artifical intelligence, computational intelligence, philosophical and psychological aspects, and information processing. Highly general philosophical and theoretical issues are complemented by specific applications in various fields.

评论

印象比较深的几篇：（1）Romero＆Soria对I as Metonymy的分析；（2）Costa＆Taysom对Kratzer's double relative modal的精细化尝试；（3）Roelofsen＆Serafini复杂语境的最简论和非-决定论方案；（4）Richamond Thomason非单调的语境内涵逻辑系统。 Ps：没找到第二届（Trento, Italia, 1999）会议论文集
