Discover a proven method for making better investment choices The actions of politicians, regulators, and economic policy makers have an enormous impact on the financial markets. In Sectors and Styles, author Vincent Catalano offers an investment technique that takes these factors into account. He illustrates how you should index a portion of your stock portfolio to the market, while investing another portion in industry sectors that are likely to outperform the broader market. To determine "hot" sectors, Catalano provides a framework for analyzing government activity, the economy, and market activity. Through proper interpretation of these events, you'll learn how to outperform the markets, while mitigating downside risk.
