著者:Maurice Frechet

出版者:Dover Publications

出版时间:2003-03-14

装帧:Paperback

isbn:9780486427867

An elementary text that can be understood by anyone with a background in high school geometry, this text focuses on the problems inherent to coloring maps, homeomorphism, applications of Descartes' theorem, and topological polygons. Considerations of the topological classification of closed surfaces cover elementary operations, use of normal forms of polyhedra, more. Includes 108 figures. 1967 edition.
