著者:Mordecai Avriel

出版者:Dover Publications Inc.

出版时间:2003-10-1

装帧:Paperback

isbn:9780486432274

This overview provides a single-volume treatment of key algorithms and theories. Begins with the derivation of optimality conditions and discussions of convex programming, duality, generalized convexity, and analysis of selected nonlinear programs, and then explores techniques for numerical solutions and unconstrained optimization methods. 1976 edition. Includes 58 figures and 7 tables.
