

**FIRST COURSE  
IN  
MATHEMATICAL  
LOGIC**

**Patrick Suppes and  
Shirley Hill**

著者:Patrick Suppes

出版者:Dover Publications

出版时间:2002-07-15

装帧:Paperback

isbn:9780486422596

Starting with symbolizing sentences and sentential connectives, this work proceeds to the rules of logical inference and sentential derivation, examines the concepts of truth and validity, and presents a series of truth tables. Subsequent topics include terms, predicates, and universal quantifiers; universal specification and laws of identity; axioms for addition; and universal generalization. 1964 edition. Index.
