装帧:CD-ROM

isbn:9780781733755

This CD-ROM is an excellent aid in preparing for the Perioperative Transesophageal

Echocardiography (TEE) Certification Exam administered by the American Society of Echocardiographers and the Society of Cardiovascular Anesthesiologists. Prepared by experts from leading hospitals, this comprehensive, interactive study tool specifically mimics the video portion of the exam, in which candidates must watch videos and quickly answer multiple-choice questions. The CD-ROM contains 45 minutes of TEE video clips and 360 multiple-choice questions, with answers, explanations, and references linked to Medline abstracts. The software allows unlimited generation of topic and practice exams that simulate actual testing conditions. Windows / Macintosh Compatible
