The Anthropology of Food and Body explores the way that making, eating, and thinking about food reveal culturally determined gender-power relations in diverse societies. Carole M. Counihan takes a cross-cultural approach to ask compelling questions about eating disorders, body dissatisfaction, bodily changes in reproduction, and gender differences around food.

Using ethnographic data from her fieldwork in Europe and the U.S., the author addresses issues around food, culture and gender such as: What powers do women gain and lose through their control over food preparation and distribution? What do food images in children's fantasy stories tell us about their sense of self? How do beliefs about eating and intercourse in different cultures reflect and affect gender ideology? How does the objectification of the female body subordinate women, and how can women challenge it? And how do pregnancy and birth affect women's body image and empowerment? This book brings feminist and anthropological theories to bear on these provocative issues and will interest anyone investigating the relationship between food, the body, and cultural notions of gender.</P>

评论

不喜欢female victimization视角，但关于How boys and girls use metaphors of devouring, being hungry and feeding in different/similar ways to cope with childhood: establishing gender identity and autonomy的讨论挺好玩的。

(完成这一系列论文时) 作者先是一位20世纪的feminist，然后才是一位20世纪的人类学家。
