But as in those early times, when men were few, and aggressions rare, there was less occasion for examples, God restrained by an express commandment the impulse of nature which appeared lawful, he forbad any one to kill the murderer, at the same time prohibiting all intercourse with him, even so far as not to touch him.

作者介绍:

Grotius describes the situations in which war is a valid tool of law enforcement and outlines the principles of armed combat. Though based on Christian natural law, Grotius advanced the novel argument that his system would still be valid if it lacked a divine basis. In this regard he pointed to the future by moving international law in a secular direction.
