This book constitutes the refereed proceedings of the First International Conference on Pervasive Computing, Pervasive 2002, held in Z&#252;rich, Switzerland in August 2002.

The 20 revised full papers presented together with an invited paper were carefully reviewed and selected from a total of 162 submissions. The papers are organized in topical sections on system design; applications; identification and authentication; models, platforms, and architectures; location and mobility; and device independence and content distribution.
