Adopting a back-to-the-basics approach, this best-selling little Mac classic has been

revised and overhauled to introduce users to Tiger, Apple's newest version of its revolutionary operating system.

In the gentle, friendly, funny style that generations of computer users have come to know and love, author Robin Williams shows readers how to dive in and start working with the Mac and OS X 10.4 Tiger. Readers will learn how to find their way around the interface; use the desktop, Dock, Finder, and icons; control the mouse; manipulate windows; search with Tiger's new Spotlight feature; save and print documents; and more.

Using straightforward, jargon-free explanations delivered in logical, easy-to-follow sections, Robin is a new user's personal guide, coaching and encouraging users as they learn their way around the magic of the Mac.
