This second edition of the popular Identity in Adolescence is an updated and expanded account featuring the latest research findings from five major developmental theorists: Erik Erikson, Peter Blos, Lawrence Kohlberg, Jane Loevinger and Robert Kegan.

Jane Kroger details the key concepts of these theoretical models, giving special emphasis to their practical implications for professionals working with young people. From her own experiences in both clinical and natural settings, Kroger shows how an understanding of the stages through which identity development proceeds can facilitate appropriate intervention.
