SCENE DESIGN AND STAGE LIGHTING, Eighth Edition, continues its tradition of being the most detailed and comprehensive text available in the scenic and lighting design and technology fields. Much of the scenery design and technology section has been re-worked with an emphasis on modern technology. Changes in the lighting section

reflect current practice and technology. The authors have placed an emphasis on collaboration in all sections of the new text. "Designers at Work" interviews with professional lighting and scenery designers are a new addition to the Eighth Edition. In addition, the entirely re-written section on sound for the theatre reflects the digital age we live and work in.
