With TiVo Home Media Engine SDK you can build new and exciting applications for broadband connected Series 2 devices. In this book you will find numerous real world examples to help you deploy your own applications to TiVo quickly and easily. The authors describe software development for the TiVo platform, covering the basic

building blocks of application design. You'll discover how to create advanced applications using TiVo's component library and learn how to package your final product for others to integrate into their TiVo experience.
