For the first time ever, the senior architect and lead developer for a key enterprise system on NASA's ongoing Mars Exploration Rover mission shares the secrets to one of the most difficult technology tasks of all-successful software development. Written in a conversational, brief, and to-the-point style, this book presents principles learned from the Mars Rover project that will help ensure the success of software developed for any enterprise system. Author Ronald Mak imparts anecdotes from his work on the Mars Rover and offers valuable lessons on software architecture, software engineering, design patterns, code development, and project management for any software, regardless of language or platform.
