This new biochemistry text features a modern, chemical approach, always explaining the underlying chemistry of key biochemical molecules and reactions while taking

advantage of recent developments. Features a true thematic and modern approach with a strong emphasis on research.

- \* Retains core topics of biochemistry, using real examples of chemical reactions and molecular structures.

- \* Emphasis on depth of coverage, rather than breadth.

- \* Integrated media provides review of difficult concepts, molecular structure tutorials, and interactive animations.
