The first definitive guide to understanding and profiting from the relationship between the stock market and interest rates

It's well established that interest rates significantly impact the stock market. This is the first book that definitively explores the interest rate/stock market relationship and describes a specific system for profiting from the relationship. Timing the Market provides an historically proven system, rooted in fundamental economics, that allows investors and traders to forecast the stock market using data from the interest rate markets-together with supporting market sentiment and cultural indicators-to pinpoint and profit from major turns in the stock market.

Deborah Weir (Greenwich, CT) is President of Wealth Strategies, a firm that does marketing for traditional money managers and hedge funds. She is a Chartered Financial Analyst and is the first woman president of the Stamford CFA Society.

作者介绍:

Deborah Weir (Greenwich, CT) is president of Greenwich Consulting, a firm that provides money management and asset allocation services to institutional investors and wealthy individuals. Clients include senior portfolio managers at major financial institutions such as Chase Bank, Sumitomo Bank, and FleetBoston. Prior to forming Greenwich Advisors, Ms. Weir managed an approximately \$500 million fixed income portfolio for Scudder Investments, investing in international securities and derivatives, as well as traditional bonds. By virtue of her experience in trading bonds, Ms. Weir has developed a stock market trading system which utilizes information from the fixed income market to determine market tops and bottoms; where we are in the economic cycle; and investor psychology. Her timing system has produced an overall return of 74% higher than what investor would achieve by simply holding onto stocks since 1960. Ms. Weir has written articles for Active Trader, Futures Magazine, and Journal of Cash Management. She is a Certified Financial Analyst and is the first woman president of the Stamford Society of Investment Analysts. She has appeared on local Connecticut television and radio as a financial expert.

目录: Acknowledgments.

Introduction.
