This is a scholarly assessment of the American composer Charles Ives, whose life and work have remained enigmatic since his death in 1954. A successful insurance executive in Hartford, Connecticut, Ives used a considerable part of his tidy income to promote serious modern music, and despite his day job maintained a prolific output of scores himself. He was a robustly opinionated and confident individual who eschewed easy listening; his atonal works were considered almost un-American. Yet he also sought recognition that just eluded him in his lifetime. Ives is increasingly known around the world. Jan Swafford, himself a composer, should help win even more interest with this sympathetic biography.
