出版时间:2003-05-20

装帧:Hardcover

isbn:9780894648779

This is a comprehensive, detailed reference work on the nine genera and their species in the family Viperidae. The book incorporates the efforts of David Mallow and David Ludwig as well as the up-to-date taxonomy of Göran Nilson. The result is a valuable reference describing the frontier of knowledge of viper taxonomy. Each species account is based on a thorough review of the world literature and includes information on ecology, biology, physiology, toxinology, distribution, behavior, and husbandry. This book is an invaluable reference for professional and amateur herpetologists; for ecologists and environmental scientists; for educators; and for keepers and breeders. The text is supplemented by 71 color plates and includes an extensive bibliography.
