Mo' Urban Dictionary has even more witty, funny, and irreverent definitions to crack the

code of contemporary slang. The book contains about 2,000 definitions from the site's expansive collection, such as: table banking - while splitting a check when out with a group, paying the whole tab with your credit card and taking everyone else's cash instead of going to the ATM stall call - using a public bathroom while on the phone courage dot com - when someone tries to be badass over the Internet, only because they aren't actually face-to-face with anyone
