isbn:9780521379083

The great Elizabethan divine Richard Hooker has occupied a prominent place in the intellectual history of the Church of England and sixteenth-century Protestantism but his wider significance has often been neglected. In his introduction to this selection of books from *Of the Laws of Ecclesiastical Polity*, Professor McGrade demonstrates clearly the continued relevance and importance of the particular politico-religious project Hooker undertook and shows that *The Laws* offer far more than simply an apologia for the Elizabethan religious settlement. The text of this version is based on the authoritative Folger edition and presents those sections of *The Laws* most important to an understanding of Hooker's wider aims and context.
