Face it: Poorly designed, static Web sites just don't cut it anymore. The Web (not to mention the technology surrounding it) has been around long enough, and people have grown accustomed enough to dealing with it, that folks want (and expect) a little

razzle-dazzle when they go online. For just \$12.99, this compact guide shows you how to deliver it! Whether your boss wants you to jazz up the company's Web site or you're burning the midnight oil trying to pull together some Web animations for a class project, this tightly focused, project-based guide shows you how to start creating Flash animations in an instant! Using big, bold full-color pictures and streamlined instructions, it covers just the need-to-know essentials that will get you animating with Flash: using the Flash authoring tool, creating and animating graphics, tweening, adding sound, and more. </p>
