著者:John Prados

出版者:Wiley

出版时间:2000-03-10

装帧:Paperback

isbn:9780471379454

"Enormously illuminating. . . . John Prados can lead a reader, from the battle buff to the expert, through the series of campaigns near the DMZ and along Route 9 better than any other author I have read. . . . His understanding of the decision-making process in Hanoi is nuanced and sophisticated. . . . A first-rate book from a first-rate scholar."  
Robert K. Brigham, Vassar College

"The most comprehensive treatment yet of the Ho Chi Minh Trail and its place in the war." Washington Post

"An excellent book about one of the most important facets of the Vietnam War. . . . From now on it will be irresponsible for any Vietnam War scholar to deal with the strategy for this still controversial conflict without referring to The Blood Road, a thoughtful, painstakingly researched book." The Quarterly Journal of Military History

"A valuable work of interest to all scholars of the Vietnam War." Journal of Military History

Could the United States have won the Vietnam War if it had been able to cut off the Viet Cong from their North Vietnamese support by severing the Ho Chi Minh Trail? Acclaimed historian John Prados tackles this crucial question in this elegant, unprecedented, and exciting work of historical scholarship. Aided by recently declassified government documents and previously unavailable oral histories, memoirs, and interviews, Prados explores all sides of the conflict, providing details of the action in Hanoi and North Vietnam and avoiding the narrowly focused battle histories, atomized individual accounts, and overly generalized visions dominating previous histories.
