著者: Todd Anglin

出版者: O'Reilly

出版时间: September 2007

装帧:

isbn: 9780596516116

作者介绍:

Christian Wenz is an author, trainer, and consultant. His main focus of working and writing is on web technologies and security. Christian has written or co-written over 50 books for various publishers. He works with both open source and closed source web technologies. This leads to the unusual situation that he has both been awarded a Microsoft MVP for ASP/ASP.NET and is listed in Zend's Who is Who of PHP. He is also listed in Mozilla's credits (about:credits) and is considered an expert in browser-agnostic JavaScript.

Apart from writing and working on web projects, Christian also frequently speaks at developer conferences around the globe that cover web technologies. Among them are 2005's Microsoft Tech Ed Europe conference (BOF session) and the 2005 Zend Conference.

Essential

评论

偏重架构性的一本书，具体技术上指导的一般，但能让人充分理解WPF工作的原理

目前只能拿到E文版

内容比较少
