isbn:9780764123597

This new edition has been updated to reflect the most recent Advanced Placement Physics B exams. It presents a diagnostic test with answer key plus two full-length AP Physics B practice tests modeled on actual exams. All questions are answered and explained. Extensive review material covers all Physics B topics: vectors, Newton's laws of motion, work and energy, impacts and linear momentum, torque and angular momentum, oscillatory motion, gravitation, temperature and heat, thermodynamics, electrostatics, electric circuits, magnetism, electromagnetic induction, waves and sound, light, geometrical optics, quantum theory, the atom, the nucleus, and special relativity. Added features include test-taking advice, a glossary, a math review, and physics charts and tables
