出版时间:2004-12-30

装帧:Hardcover

isbn:9780072970487

This full-color, introductory environmental science text is known for being concise, conceptual and value-priced. The approach and reading level cover the basic concepts

without overloading students with too much detail. With the central theme throughout the text being interrelatedness, the authors identify major issues and give appropriate examples that illustrate the complex interactions that are characteristic of all environmental issues.
