You are a wonderful woman (everybody says so!) and you want to get married. But six months, a year, more years go by and you still aren't married. What's the problem? The

problem is that you have wasted time on the wrong men. And when you are with the wrong man, you aren't available to meet the right man.

Men who aren't interested in marriage can easily trick you into thinking that they are. The List identifies subtle red flag behavior immediately so you won't be fooled again. For example, did you know that:

A man who takes you out for a last minute coffee date is more likely to say "I do" than one who plans an elaborate date at his favorite restaurant? A man who brings you into his social circle right away probably won't end up popping the question? A man who constantly sends e-mails/text messages is less likely to marry you than a man who simply calls every night? (And that sometimes it is okay to wait by the phone?)

Other books tell YOU how to act. The List tells you how HE will act if he is going to marry you. With The List, you will never have your time wasted or your heart broken again. You will be closer to marriage than ever before.
