isbn:9780465007868

All humans see the world in two fundamentally different ways: even babies have a rich understanding of both the physical and social worlds. They expect objects to obey principles of physics, and they're startled when things disappear or defy gravity. Yet they can also read emotions and respond with anger, sympathy, and joy. In *Descartes' Baby*, Bloom draws on a wealth of scientific discoveries to show how these two ways of knowing give rise to such uniquely human traits as humor, disgust, religion, art, and morality. How our dualist perspective, developed throughout our lives, profoundly influences our thoughts, feelings, and actions is the subject of this richly rewarding book.

关于发展，认知，艺术，道德，宗教心理学，还有恶心，笑等等小的主题，讲述非常有趣。但对于整本书提出的大问题，似乎离解决还很远。
