Part 1 Probability theory

1 Random Events

2 Random Variables

3 Parameters of the distribution of a random variable

4 Characteristic functions

5 Some probability distribution

6 Limit theorem

7 Markov chains

8 Stochastic processes

Part 2 Mathematical statistics

9 Sample moments and their functions

10 Order statistics

11 An outline of the theory of runs

12 Significance tests

13 The theory of estimation

14 Methods and schemes of sampling

15 an out line lf analysis of variance

16 Theory of hypotheses testing

17 Elements of sequential analysis
