

# Longevity, Senescence and the Genome

[Longevity, Senescence and the Genome 下载链接1](#)

著者:Finch, Caleb E.

出版者:Univ of Chicago Pr

出版时间:1994-5

装帧:Pap

isbn:9780226248899

Featuring extensive references, updated for this paperback edition, "Longevity, Senescence, and the Genome" constitutes a contribution to biomedicine and the

evolutionary biology of ageing. To enhance gerontology's focus on human age-related dysfunctions, Caleb E. Finch provides a comparative review of all the phyla of organisms, broadening gerontology to intersect with behavioral, developmental, evolutionary, and molecular biology. By comparing species that have different developmental and life spans, Finch proposes a typology of senescence from rapid to gradual to negligible, and he provides the first multiphylectic calculations of mortality rate constants.
