Can psychology explain religious behavior? This book explores the thinking of eight pioneers of religious psychology, including Sigmund Freud and Carl Jung. Fuller presents the theories of these seminal figures in a clear, straightforward way, and also examines the limits of psychological explanations of religion. He concludes the book by exploring the contributions to religion by some prominent recent figures in psychology such as Ana-Maria Rizzuto, Paul W. Pruyser, and Bernard Spilka. Praise for the latest edition of *Psychology and Religion*: "Professor Fuller has made a valuable contribution to students of psychology and religion. He has brought together in a single volume eight of the most important thinkers in their field. By presenting the views of these seminal figures in a cogent, straightforward manner and with scholarly faithfulness to their ideas, Fuller has eased the task of exploring an extremely challenging area. He is to be commended for his impressive effort." -Steven M. Rosen, The College of Staten Island
