In 1920s Munich, the body of Anna Gross, a young society wife, has been found in the English Gardens, still clothed in finery. Soon a second body is discovered, also a woman of high society. When a third body is found, homicide detective Axel Berg realizes he's dealing with unprecedented evil. Is the murderer politically motivated? Is he a lone madman? Or worse, is the killer possessed by both political and personal demons? Detective Berg soon finds himself entangled in a web of dangerous intrigue, surrounded by potential enemies. As Munich slips further into turmoil, overrun by political factions and the rise of Hitler, a dedicated policeman can never know who to trust--and one simple mistake could be deadly.
