Growing up in Panama City in the 1950s, young Delia Pineda is aware that the strain between her and her domineering older sister, Maria Elena, has something to do with her mother's past. This endearing novel traces her efforts to piece together the whispered pieces of a puzzle to uncover a family secre. Delia's growth is marked by a blossoming compassion for her tormented family and a firm conviction to lead a different life, free from unspeakable bonds of deception that keep the family together.
