isbn:9781405156264

This book investigates the morphosyntax, semantics and discourse properties of focus and wh-constructions in Hausa, and introduces readers to aspects of the syntax of a major world language unfamiliar to most linguists. Represents the first detailed and comprehensive exposition of focus related constructions in Hausa from the perspective of a major contemporary theoretical framework. Explores aspects of the syntax of focus in Hausa which have only recently begun to be described. Authoritative and up-to-date, detailing recent developments in the theory, and reviewing and

evaluating a number of current approaches to the syntax of focus constructions and non-verbal copular clauses Contains comparative data from related Chadic/Afroasiatic languages Serves to introduce readers to aspects of the syntax of a major world language unfamiliar to most linguists.
