This book is a masterpiece of theoretical thought. It anticipates the actual achievements of much of what we now call sociolinguistics. The 'dialectic of the sign' and of the verbal sign in particular as it is presented in the book acquires great suggestive value in the light of today's debates about semiotics.

--Roman Jakobson

In this one book a reader can discover the ideas of Bakhtin and his circle about language, not as a conceptual metaphor, but as that aspect of human life which is in fact the subject matter of a cumulative science. Its critical account of the state of linguistic thought in the first decades of the century is all that a sociological or Marxist critique can and should be: not a stereotyped application of received categories, but an attempt to think through from the foundation the consequence of taking social interaction; not the abstract individual speaker, as starting point Brilliant.

breaks the static, hermetic system of language

这本书受到索绪尔影响很大，在我看来，它把索批评得也很有力道，针锋相对地主张注重语言的社会性，反对将语言从社会中割裂出来的结构主义语言学，还正视语言的流变，这既是唯物的又是历史的，很马克思主义。推荐第二部分第二、三、四章，以及最后两个附录中的评论文章。
