isbn:9780838909317

Library building projects leave a legacy for decades, with one chance to get it right. Those with access to a trustworthy expert who can explain the process in step-by-step terms will have the best change to make their projects succeed. Expert author

McCarthy is an architect with in-depth expertise in building libraries as well as an 18-year veteran library trustee. This authoritative overview is filled with practical advice to understand key relationships and manage a complex process. Checklists and sample construction documents provide hands-on insights into the best practices in library construction and tools to do the job.
