Out for a Walk offers toddlers their first look at signs for the world around them. As they follow our distinctively hatted youngster on a stroll, they encounter familiar animals and insects, among them a dog, cat, butterfly, and squirrel, and learn which ones can be pets. They'll enjoy imaginative images of the senses, too -- sight, smell, hearing, taste, and touch. Printed on robust cardboard stock, these delightful full-color books will engage toddlers in new topics as they discover more basic signs, proven to accelerate their grasp of language.
