College Reading and Study Skills, a developmental-level text, focuses on teaching reading and study skills through direct instruction and multiple opportunities for skill application. College Reading and Study Skills was written primarily for the courses that

are half reading, half study skills. The illustrated introduction consists of ten Success Workshops on skills that directly contribute to success in college. Each chapter provides concise instruction on the topic it covers, skill application exercises, exercises that use textbook excerpts, interactive and collaborative activities, writing activities, and a Self-Test Summary and Quick Quiz.
