

# Discovering Language

[Discovering Language\\_ 下载链接1](#)

著者:Jeffries, Lesley

出版者:Palgrave Macmillan

出版时间:2006-7

装帧:HRD

isbn:9781403912619

This text provides students with the basic descriptive knowledge they are required to master before moving on to more advanced study. The book is organized under thematic headings, which are thoroughly cross-referenced, enabling students and teachers to use the book as required--either as a course text or to help with individual aspects of language. Each section includes an introduction, worked examples, "in context" sections relating the topic to real text examples, suggestions for further reading and analysis and a summary.
