With all of the new developments in information storage and retrieval, researchers today need a clear and comprehensive overview of the full range of their options, both online and offline, for finding the best information quickly. In this third edition of *The Oxford Guide to Library Research*, Thomas Mann maps out an array not just of important databases and print sources, but of several specific search techniques that can be applied profitably in any area of research. From academic resources to government documents to manuscripts in archives to business Web sites, Mann shows readers how best to exploit controlled subject headings, explains why browsing library shelves is still important in an online age, demonstrates how citation searching and related record searching produce results far beyond keyword inquiries, and offers practical tips on making personal contacts with knowledgeable people. Against the trendy but mistaken assumption that "everything" can be found on the Internet, Mann shows the lasting value of physical libraries and the unexpected power of traditional search mechanisms, while also providing the best overview of the new capabilities of computer indexing. Throughout the book Mann enlivens his advice with real-world examples derived from his experience of having helped thousands of researchers, with interests in all subjects areas, over a quarter century. Along the way he provides striking demonstrations and powerful arguments against those theorists who have mistakenly announced the demise of print. Essential reading for students, scholars, professional researchers, and laypersons, *The Oxford Guide to Library Research* offers a rich, inclusive overview of the information field, one that can save researchers countless hours of frustration in the search for the best sources on their topics.

千万不要以为有互联网就拥有一切，这本书可以告诉你为什么图书馆依然是你做研究和
学习任何知识的得力助手

文献检索课基本内容。看来葛剑雄让复旦图书馆馆员不仅要对馆藏熟悉，并且要能引导
教师在各个学科的研究的要求一点也不过分。

原来图书馆管理员门槛还蛮高的。。。作者讲了好些文献资料的查找方法，推荐学者研
究者参考。不过作者列的资源也太包罗万象了，我觉得说说方法论就够了嘛

It could have been condensed into 200 pages.

本书绝对应该列入中学生必读书目中去！不看不知道图书馆还有这么多内容。学会学习
就要先学会学习的方法，本书讲的就是如何在信息爆棚的现代社会找到想要的信息的方法，
而不是在百度谷歌或者图书馆书架前乱转。即使不是搞专项研究，只要你对某方面的
