装帧:Hardcover

isbn:9780789028006

"Metadata" provides catalogue librarians and students with a comprehensive instructional resource on the ongoing convergence of cataloging and metadata. Equally valuable in the classroom and as a professional reference tool, this unique book serves as an introduction to the concepts of metadata within bibliographic contexts, demonstrating the potential for resource description. The book introduces various metadata schemes including the Dublin Core, Encoded Archival Description (EAD), and Extensive Markup Language (XML) and discusses how to plan and implement a metadata - driven digital library.
