Author instructs readers on his Acceleread method. Readers learn how to preview chapters, books, reports, letters, memos, and newspaper and magazine articles as valid aids to becoming a faster, more effective reader; to overcome wasted eye movement while reading; to develop eye control and increase eye span (visual awareness/field-of-view); to employ and benefit from pacing and block reading; to master and use the "two-stop" method for faster reading; easy means to estimate the number of words in any type of publication; methods and techniques to prepare mentally and psychologically for any test or examination; common-sense ways to assure higher scores on any true-false quiz; helpful information to achieving better grades on multiple-choice tests; to make essay-type tests easier and improving chances for a more positive outcome and a better mark. Book also includes practice passages and tests to measure reading comprehension.
