...the Voice of the Afterlife. Don't believe the hype. The missionaries may say they help folks, but who do you think started all this? They're some bad people, brothers and

sisters. They're helping something big and nasty, and they ain't scared of you. In fact, they know every trick you do. How do you figure they're so good at being dead? You may not like the answer, because the truth has a taste for you." In Shadow Games, the true nature of the characters' adversaries is revealed, as is the cult behind the Pigment trade, and its connection to Spectres. Helping the heroes, however, is a new character class, new roles to combat the coming storm, and a new way to use Spite to fuel abilities in a deadly gamble between need and power.
